

DO YOU SUFFER FROM MILD ATOPIC DERMATITIS OR PSORIASIS?

Local dermatology practices are conducting a research study of a new investigational topical medication for people that have been diagnosed with mild Atopic Dermatitis or Psoriasis.

QUALIFICATIONS INCLUDE:

- Adults at least 18 years old
- Presence of lesions representing 1-10% of total body surface area
- Lesions on arms, legs, or body

QUALIFIED PARTICIPANTS WILL RECEIVE:

- Study care and investigational medication or placebo at no charge
- You may receive compensation for your time.

IF YOU BELIEVE YOU MEET THE ABOVE CRITERIA, PLEASE CONTACT ONE OF OUR LOCATIONS BELOW

Denver, Lowry Office:
(303) 261-1525

You will be scheduled for a telephone screening, followed by an office appointment to see if you qualify. Participation in this study is voluntary.
